PROFESSIONAL SUMMARY

Final-year BSc Information Technology student with hands-on programming experience in Python, C#, Java, C++, and SQL, and a strong grounding in database design and algorithmic problem-solving. I thrive on breaking down complex technical problems and explaining them clearly, a strength I built through real tutoring experience, not just coursework. I combine a genuinely proactive and self-directed approach to learning, with a track record of picking up new tools quickly and independently. I am eager to bring that same curiosity and clarity to a graduate or internship role where technical depth meets real-world application.

KEY SKILLS

- Programming & software development
- Attention to detail & accuracy: consistent precision required across quantitative and coding coursework
- Clear technical communication: explaining technical/analytical concepts clearly (peer tutoring)
- Fast learner: managing multiple demanding technical disciplines concurrently
- Problem-Solving and Analytical thinking
- Self-directed learning: Quick to pick up new tools/technologies independently

EDUCATION

North-West University, Potchefstroom

2024 – Present

Bachelor of Science in Information Technology (Final Year)

- **Relevant coursework:** Artificial Intelligence, Python Programming, C# programming, Operations Research (linear programming, optimisation), Databases (ERD/Data modelling, requirements analysis & SQL), Data Structures and Algorithms, Decision Support Systems

WORK EXPERIENCE

Communications Tutor

Feb 2026 – June 2026

- Guide students through structured problem-solving techniques, breaking down complex material into clear, actionable steps
- Communicate technical and conceptual content clearly to a range of learning styles

C# Tutor

Aug 2025 – Nov 2025

- Helped students design, develop, and debug C# code solutions end-to-end
- Identified recurring errors and explained root causes rather than just fixes, improving student understanding

TECHNICAL SKILLS

- Programming Languages: SQL, Python, C#, C++, Java
- Frameworks: .NET Framework
- Web: HTML, CSS, JavaScript
- Databases: relational databases, data modelling fundamentals
- Tools: VS Code, Microsoft Office

CERTIFICATES

Security Operations Center in Practice

Issued April 2025

Issued by IBM
